## CLEAR SPACE

---

The ANYLOAD logo must stand out clearly from its surroundings.

This applies not only in the background, but also to interference from nearby text, photographs and other graphic elements that might compromise the impact of the logo. It is important to keep the logo clear of any other graphic elements. To ensure this, an exclusion zone or 'clear space' rule has been established using the icon. This exclusion zone indicates the closest any other graphic message can be positioned in relation to the marque. The example on this page demonstrates the minimum clear space required.
